

Im a Over The Road Truck Driver,I listen to xm all the time.There traffic and weather is above all the other stations.It is a constant source,in great detail that helps driver like myself make better and more informed decisions on our routes,and times to rest due to traffic jams or sevre weather where we travel.As a subscriber to xm im paying for this service,I want it to remain.Most xm listeners are drivers and xm provides us with a valuble service.When listen to am/fm reports,like in Chicago,its take them like 20 sec to cover all the freeways in and out,where with xm it a slow precise report and has been invaluble to me.Please do not mess with a good thing.

Steve Sutton
